

Preschool

Education

Inclusion Preschool

Our unique preschool program includes children with special needs in classrooms with typically developing children.

Excellent Curriculum

Our team of Early Childhood Specialists use award winning education programs from the most respected associations for early childhood curriculums.

Special Needs Focus

Children with special needs participate in all classroom activities with modifications made as needed. This may include adaptations and modifications to the curriculum, activities and schedules.

Related Services

Our integrated setting also allows children with special needs to receive related services like physical, occupational or speech therapy during their preschool day, with a team approach to service delivery.

Preparing for Success

We provide children with the ongoing services and supports that they need to succeed. Studies show that inclusion prepares children with special needs for school and the real world, results in higher developmental outcomes, develops improved communication and social skills, and promotes relationships with peers.

Enrollment

CPSE

Your school district's Committee on Preschool Special Education (CPSE) can recommend your child to Little Lukes preschool. The CPSE is a group of educators and administrators who create education plans for children with special needs.

Referral

To receive preschool special education services, your child must be referred to the CPSE and evaluated to determine eligibility. You may choose Little Lukes as your evaluation site.

Education Plan

Next the CPSE creates an Individualized Education Program (IEP), a detailed plan of your child's goals and objectives and the necessary programs and services to meet those goals.

Transition from EI

Children in Early Intervention who are as young as 2 years 9 months may begin the transition from Early Intervention to Preschool Services. Little Lukes is an approved integrated preschool.
